master

Protect matching branches

☒ Require a pull request before merging

When enabled, all commits must be made to a non-protected branch and submitted via a pull request before they can be merged into a branch that matches this rule.

☒ Require approvals

When enabled, pull requests targeting a matching branch require a number of approvals and no changes requested before they can be merged.

Required number of approvals before merging: 1 ▼

☒ Dismiss stale pull request approvals when new commits are pushed

New reviewable commits pushed to a matching branch will dismiss pull request review approvals.

☐ Require review from Code Owners

Require an approved review in pull requests including files with a designated code owner.

☐ Restrict who can dismiss pull request reviews

Specify people or teams allowed to dismiss pull request reviews.

☐ Allow specified actors to bypass required pull requests

Specify people or teams who are allowed to bypass required pull requests.

☒ Require status checks to pass before merging

Choose which [status checks](#) must pass before branches can be merged into a branch that matches this rule. When enabled, commits must first be pushed to another branch, then merged or pushed directly to a branch that matches this rule after status checks have passed.

☒ Require branches to be up to date before merging

This ensures pull requests targeting a matching branch have been tested with the latest code. This setting will not take effect unless at least one status check is enabled (see below).

☐ Require conversation resolution before merging

When enabled, all conversations on code must be resolved before a pull request can be merged into a branch that matches this rule. [Learn more](#).

☐ Require signed commits

Commits pushed to matching branches must have verified signatures.

☐ Require linear history

Prevent merge commits from being pushed to matching branches.

☐ Require deployments to succeed before merging

Choose which environments must be successfully deployed to before branches can be merged into a branch that matches this rule.

☒ Include administrators

Enforce all configured restrictions above for administrators.

☐ Restrict who can push to matching branches

Specify people, teams or apps allowed to push to matching branches. Required status checks will still prevent these people, teams and apps from merging if the checks fail.

Rules applied to everyone including administrators

☐ Allow force pushes

Permit force pushes for all users with push access.

☐ Allow deletions

Allow users with push access to delete matching branches.
